

Steel Bridge Seminar

As a part of the European R&D project SBRI+, Ramböll will host a seminar in Stockholm on March 6th, 2018.

The seminar gives an opportunity of learning about LCC/LCA aspects and smart steel solutions from around Europe as well as upcoming large projects in Sweden.

We hope this seminar will give designers, contractors, researchers as well as bridge owners and students a chance to meet.

Program

1000-1030	Introduction, Ramböll R&D in steel bridges - Peter Collin
1030-1115	RFCS project SBRI - Ulrice Kuhlmann, Univ. Stuttgart
1115-1200	Environmental life cycle assessment - Constanca Riquiero, Univ. Coimbra
1200-1300	Lunch (Free of cost)
1300-1345	Cost life cycle analysis - Andre Orçesi, IFSTAR
1345-1415	LCA/LCC according to Trafikverket - Peter Simonsson, Swedish Road Administration
